Redding Introduces Dies for the 22 TCM Cartridge.

Cortland, NY.....New for 2015, Redding Reloading Equipment is offering a full length die set for the popular new 22 TCM Cartridge.

The popularity of this new chambering demanded Redding produce high quality reloading dies for the serious handloader. As both an exciting handgun round and with the new emphasis as a “walking varmint” cartridge, this 22 TCM is creating quite a stir in the marketplace and reloading can only increase its capability. For 2015 Redding is introducing a Full Length 2 die set with no need for a separate expander die. This has been accomplished through the development of a specialized reduced duration size button which allows the sizing die to function normally even with the short overall length of the 22 TCM case. This significantly reduces the amount of time and die changes in the loading process without compromising the quality of the finished round.

Customers should know that these dies will be available shortly after the SHOT Show in retail distribution and that Redding Reloading Equipment will continue to support new factory calibers as they are introduced. Redding is known for both quality and a vast selection of available dies, including many popular and not so popular wildcats.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946. To learn more about our ongoing commitment to the precision handloader and to request a copy of the new 2015 Redding catalog visit:
