

# REDDING

## RELOADING EQUIPMENT

**The Best**  
*Ammunition*  
**in the World is Crafted**  
**by Your Hands**

*And Our Tools!*

— Product Catalog 2015 —

## The Redding Difference . . .

**A**s a handloader you are in total control of the ammunition that you create. Whether you are crafting ammo for your grandfather's heirloom or the latest custom built hunting or target rifle, you create ammunition that gives perfect results for the task at hand. Results that simply can't be bought off the shelf. It's a matter of personal pride and confidence.

At Redding we share that emotion because we put that same pride into all of the products that we design and build. We continually strive to build the best in the world and are continuing the tradition started here in 1946. We build all of our products here using only American steel and castings. We don't outsource our jobs overseas and we don't seek the lowest bidder.

Quality is our foundation – doing it right will always trump saving a penny or two at the expense of quality. It's simply the right thing to do – its the Redding difference.

*. . . The Redding Team*

## What's New for 2015 . . .

*New!* **Premium Series Die Sets**

See Page 16

*New!* **Drop Tube Extension**

See Page 27

*News!* **Imperial Bio - Green Case Lube**

Imperial Bio-Green has proven to be our best liquid formulation ever and is now included in all kits.

See Pages 34, 35 and 40

*News!* **Micrometer Adjustable Crimping Dies**  
Profile Crimp options added

See Page 2

*New!* **Die Sets and Competition Seaters for 26 & 28 Nosler** – See Pages 8, 12 & 17

*News!* **Master Hunter Die Sets**  
Now available in 26 & 28 Nosler

See Page 17

*News!* **Dual Ring Carbide Sizing Dies**  
Now available in complete sets

See Page 3

*News!* **National Match (NM-C) Die Sets**  
Now Supplied with Carbide Size Buttons

See Page 17

# Imperial Lubricants – produced by Redding

**Highly respected Imperial Lubricants complement the Redding product line and are now produced at the Redding facility.**

Imperial Sizing Die Wax is the most recognized product of the line. Because of its superior performance and ease of application and cleanup, this product has been a favorite of knowledgeable reloaders for years. Redding is committed to maintaining the integrity of this product by producing it to the exact formulation that made it so popular.

Imperial Dry Neck Lube is the perfect lube for those who neck size. This product can be used inside and outside the case neck, reducing the drag on both the die and size button without concern about powder contamination.

## Imperial Bio-Green Case Lube

A petroleum free, super duty case forming and resizing lubricant made from biodegradable plant materials. Will not stain your brass – easy water clean up. Our best formulation ever!

**ITEM NO. 07300 . . . . . \$10.20**

## Imperial Convenience-Pak with Application Media

A convenient way to purchase Imperial Application Media (Item No. 07900) together with Imperial Dry Neck Lube for replenishment (Item No.07700) in one handy container.

**ITEM NO. 07200 . . . . . \$22.90**

## Imperial Dry Neck Lube

For use inside and outside the case neck to reduce drag on both the die and size button without concern of powder contamination. Packaged in 1 oz. container.

**ITEM NO. 07700 . . . . . \$10.50**

## Imperial Sizing Die Wax

“The original” - a favorite among discriminating reloaders. Packaged in 1 oz. & 2 oz. tins.

**ITEM NO. 07500 (1 oz. tin) . . . . \$9.60**

**ITEM NO. 07600 (2 oz. tin) . . . \$13.30**

## Imperial Application Media

The easy way to apply dry neck lube to case necks. Simply dip the cartridge case neck into the ceramic media. The media consists of high density ceramic spheres that are pre-charged with Imperial Dry Neck Lube. Can be used with all cartridge cases including 17 cal.

**ITEM NO. 07900 . . . . . \$13.30**

# Competition Bullet Seating Die

## for Handgun & Straight Wall Rifle Cartridges

### Patented System of Bullet Alignment

This die features a very unique way to bias the bullet into alignment with the cartridge case.

The precision fitting, spring loaded seating stem is allowed to move down into the chamber of the die, aligning the bullet and cartridge case well in advance of bullet seating.

Precise alignment is then maintained as the bullet and cartridge case move upward until seating is accomplished.

This *Patented System* assures you of the best possible bullet alignment.

### Micrometer Adjustment

The micrometer is calibrated in .001" increments to simplify setting and recording bullet seating depth. Switching bullets and experimentation has never been easier.

### Separate Crimp

Competition shooters know that superior reloads are produced when bullet crimping is performed as a separate operation. Therefore this no compromise die has no crimping capability. A superior crimp will be accomplished by using our "Profile Crimp" or "Taper Crimp" die.

### Progressive Press Compatible

The industry standard 7/8 - 14 threaded die bodies have been slightly extended to allow full thread engagement of the lock ring. An oversize bellmouth chamfer with smooth radius has been added to the bottom of the die to ease case and bullet entry in progressive presses.

See chart for cartridge availability . . . . . **\$130.80**

**The Most Advanced  
Bullet Alignment  
Available**

45-70 Government	55209

# Micrometer Adjustable Crimping Dies

## Top adjusting for progressive presses with tight space constraints

Redding's new Micrometer Adjustable Crimping Dies are **top adjusting** to simplify making precise adjustments because any variation in case length and wall thickness both adversely affect proper adjustment.

Traditional Taper Crimp Die adjustment is both time consuming and imprecise due to the coarse 7/8 - 14 pitch die threads and the need to re-position the lock ring, this is especially important to users of progressive reloading presses with tight space constraints.

The new Micrometer Adjustable Crimping Dies have a knurled micrometer barrel situated on the top of the die for easy access and provides approximately  $\pm .100$ " of "on-the-fly" adjustment in .001" increments.

Versatility is enhanced on handgun dies by being able to reverse the internal crimping sleeve to accommodate two different cartridges having closely related body diameters. An example is the 38 Super and the 9mm family of cartridges. *Rifle cartridges are non-reversible.*

See chart for cartridge availability . . . . . **\$95.30**

Cartridge	Type	Item No.
-----------	------	----------

223 Remington (Non-Reversible)	Taper Crimp	31111
308 Winchester (Non-Reversible)	Taper Crimp	31155
38 Special / 357 Magnum	Profile Crimp	31282

# Dual Ring Carbide Sizing Die Sets

## The correct answer for sizing straight wall handgun cartridges.

Dual Ring Carbide Sizing Dies are the correct answer to the compromise that has plagued traditional carbide dies of all manufacturers since their creation.

The traditional sizing ring is required to perform double duty *which it can not do*. It is required to size the case sufficiently to secure the bullet (with even the thinnest brass) which all do with some success. From that point however, all traditional carbide dies resize the remainder of your cases excessively.

The price of this compromise is shortened case life of your overworked brass, unsightly appearance and less than ideal chamber fit which may lead to an adverse effect on accuracy.

The Redding solution is unique, incorporating two carbide rings within one sizing die. The upper ring is positioned to size only the bullet retention portion of the cartridge case while the other is configured to properly size the case body without overworking the brass. Your sized cases will not only look good and function better but brass life will increase.

Since customers have been asking for Dual Ring Dies in complete sets, we are now packaging them in the same three configurations as our traditional die sets, as well as individually.

See chart below for availability.

  - Dual Ring Carbide Sizing Die only ..... \$156.10

### - Tech Talk - The Dual Ring Advantage

The first and most important task of traditional single ring carbide dies (of all Manufacturers) is to resize the cartridge case sufficiently to secure the bullet. Unfortunately the SAAMI specifications that control the cartridge case wall thickness have a  $-.006"$  tolerance. This requires the carbide sizing ring diameter to be designed relatively small, small enough to sufficiently resize the thinnest possible brass. This diameter then resizes the remainder of the case excessively.

It becomes obvious that the two areas of concern should be resized at different diameters. This compromise has been tolerated for years by handloaders for the sake of convenience, the convenience of not lubricating cases.

Our accuracy tests involving the 44 magnum @ 200 meters for Handgun Silhouette had long ago proven that our properly dimensioned steel sizing dies would always outperform traditional single ring carbide dies in the accuracy department with much better case life.

Our new Dual Ring Carbide Dies are able to replicate the advantages of our steel dies without the need for lubrication.

Cartridge	Dual Ring Carbide Sizer Die	Dual Ring Carbide Die Set	Dual Ring Pro-Series Die Set	Dual Ring Competition Pro-Series Die Set
38 Special	95183	01183	02183	06183
357 Magnum	95182	01182	02182	06182
40 Smith & Wesson	95272	01272	02272	06272
44 Special	95187	01187	02187	06187
44 Magnum	95186	01186	02186	06186
45 ACP	95189	01189	02189	06189
45 Colt	95191	01191	02191	06191

# Titanium Carbide Die Sets

Titanium carbide differs considerably from other carbides, and is the ideal material for resizing cartridge cases. Titanium carbide has the highest hardness of any readily available carbide. The difference is in the microstructure. Viewed under a microscope it appears smooth and rounded, which presents a slippery non-galling surface, ideal for lubeless resizing of cartridges.

Two types of die sets are available. The conventional three (3) die set includes the titanium carbide sizing die, expander die and bullet seating die with built-in crimp.

The "Pro (progressive) Series Die Set" is a special three (3) die set designed for use in progressive machines. An expander die is not included in these sets as the most popular progressive machines expand the case mouth at the powder drop station.

**Conventional TIC Die Set . . \$138.50**  
**9MM Luger / 500 S&W . . . \$161.70**

**Pro Series Die Set . . . . . \$157.10**  
**9MM Luger / 500 S&W . . . \$180.30**

**TIC Sizer Die only . . . \$99.90 — 9MM Luger / 500 S&W . . . \$122.20**

Progressive die sets are supplied with a profile crimp die (or taper crimp die if the cartridge headspaces on the case mouth) because the best possible crimp is attained after the bullet is seated.

All Pro Series Die Sets are designed with a special large radius at the mouth of the seating and crimping dies for easy case entry.

## Original G-Rx - Push-Thru Base Sizing Dies

The G-Rx push thru Base Sizing Die is designed to restore fired cases from 40 S&W autoloading pistols that exhibit a bulge near the base.

By passing the case completely through the new G-Rx Die, the bulge is removed and the case may be returned to service.

The new **G-Rx Carbide** accomplishes the same task without the need for lubrication.

- Item No. 96150** G-Rx Carbide Sizing Die \* . . . . . **\$119.00**
- Item No. 96040** G-Rx Steel Sizing Die \* . . . . . **59.50**
- Item No. 96010** Optional Bottle Adapter . . . . . **14.90**
- Item No. 96020** Large 32 oz. HDPE Bottle . . . . . **9.60**

\*Includes Shellholder Pushrod

Optional Bottle adapter fits std. Powder & Shot bottles with 28-410 thread.

# Competition Pro Series Die Sets

## With Competition Bullet Seating Die

“Competition Pro (progressive) Series” three (3) die sets are designed for use in progressive reloading machines by reloaders seeking the best possible bullet alignment.

All progressive die sets are supplied with a profile crimp die (or taper crimp die if the cartridge headspaces on the case mouth) because the best possible crimp is attained

after the bullet is seated with the included Competition Bullet Seating Die

An expander die is not included in these sets as the most popular progressive machines expand the case mouth at the powder drop station.

All Pro Series Die Sets are designed with a special large radius at the mouth of the seating and crimping dies for easy case entry.

**Carbide - Competition Pro Series Die Sets . . . . . \$245.20    9MM Luger and 500 S&W . . . . . \$268.40**

45-70 Government	58209	55209	91209	86209

### - Tech Talk - Frequently asked

**Q:** Why are carbide sizing dies not made for certain bottleneck and/or tapered cartridges?

**A.** While it is possible to produce carbide dies for tapered cartridges, the cost would be nearly prohibitive. Due to the tapered contact surfaces between the die and cartridge case, lubrication is still required. Thus, the advantage of carbide is lost. Any advantage in die life is negated by the increased cost.

Now anyone with a standard reloading press can benefit from advanced benchrest techniques.

## Type S – Bushing Style Dies

The amount of resizing provided by conventional reloading dies has always been dictated by the manufacturing tolerances (SAAMI specifications) of the brass cartridge case itself. Reloading die manufacturers have been forced to design the neck diameter of their dies small enough to accommodate the thinnest possible brass.

This may be as much as .008" - .010" smaller than the maximum cartridge dimensions typically shown in most reloading manuals.

Since the majority of cases that the reloader is likely to encounter in the field are thicker than the minimum specifications that the dies were designed for, case necks are often resized excessively.

It can be easily demonstrated that excessive resizing of the cartridge case quickly leads to stress distortion and concentricity problems.

The new Type S - Bushing Style Dies offer a simple solution to this age old problem.

The Type S - Bushing Style Dies, Competition Seating and Neck Sizing Dies, Body Dies and our New Competition Shellholders are all products of Benchrest and 1000 yard Competition.

## Type S – Neck Bushing Die

The new Type S - Bushing Style Neck Sizing Die provides reloaders with a simple means to precisely control case neck size and tension.

- Uses interchangeable sizing bushings available in .001" increments.
- The adjustable decapping rod allows positioning the bushing to resize only a portion of the neck length if desired.
- Concentricity is enhanced by the ability of the resizing bushing to self-center on the case neck.
- The decapping rod is supplied with a standard size button. This is especially useful for reloaders who are using commercial brass as is.
- A decapping pin retainer is also supplied with most Type S - Bushing Dies except 17 and 20 Cal. This enables neck sizing without the use of the size button for those who sort and/or turn case necks for uniformity.

All dies are supplied without bushings. For ordering numbers see pages 8 & 9

Category I	.....	\$89.20
Category II	.....	108.10
Category III	.....	133.90

Carbide size button kits are also available for all Type S Dies. See page 13 for kit numbers by caliber.

## Type S – Full Bushing Die

Full length resizing while maintaining exact control of the case neck is often desirable in one operation. The new Type S - Full Length Resizing/Bushing Die accomplishes this task with the precision you would expect from Redding.

- Uses the same interchangeable bushings (.001" increments) as those used in our bushing style neck sizing dies.
- The adjustable decapping rod allows you to adjust the bushing position, sizing only part of the neck length when desired.
- Concentricity is enhanced by the ability of the bushing to self-center on the neck of the cartridge case.
- All Type S (except 17 and 20 Cal.) dies are supplied with both the standard size button and a decapping pin retainer for the advantages and versatility described under our Type S - Bushing Style Neck Sizing Dies.

**Note:** By removing the bushing and all internal parts, the Type-S full bushing die may also be used as a body die.

All dies are supplied without bushings. For ordering numbers see pages 8 & 9

Category I	.....	\$89.20
Category II	.....	108.10
Category III	.....	133.90

**Note:** For the ultimate shoulder bump control, use these dies with our new Competition Shellholders. See page 15 for details.

# Competition Bushing Style - Neck Sizing Die

Similar in design concept to our Competition Seating Die, the cartridge case is completely supported and aligned with the sizing bushing before the sizing process begins.

As the sizing process starts, the cartridge case remains supported in the tightly chambered, sliding sleeve as it moves upward while the resizing bushing self-centers on the case neck.

The decapping rod is maintained in precise alignment by using the internal parts of the die as a linear support much like that of a firing pin.

Meanwhile, the micrometer adjustment of the bushing position delivers precise control to the desired amount of neck length to be sized.

This die was designed for use by Competition Shooters who have meticulously prepared their cartridge cases and do not wish to use a sizing button, however, carbide size button kits are available separately. Refer to pages 4 & 5 for kit numbers by caliber.

All dies are supplied without bushings. For ordering numbers, see pages 8 & 9

- Category I ..... \$172.00
- Category II ..... 205.00
- Category III ..... 254.50

## Neck Sizing Bushings

Redding Neck Sizing Bushings are available in two styles. Both share the same external dimensions (1/2" O.D. x 3/8" long) and freely interchange in all Redding Bushing Style Sizing Dies.

They are available in .001" size increments throughout the range of .185" thru .368", covering all calibers from .17 to .338 and clearly marked with size I.D.

By selecting the correct bushing, you are now able to provide just the right amount of neck tension to properly hold the bullet without excessive resizing.

**Item No. 73185 thru 73368 (specify size) ..... \$22.90**  
**Heat treated steel.** The sizing diameters are hand-polished with a surface hardness of Rc 60-62 to reduce sizing effort.

**Item No. 76185 thru 76368 (specify size) ..... \$39.10**  
 Heat treated steel as above with the addition of a *Titanium Nitride* surface treatment to further increase the effective surface hardness and reduce sizing friction.

**Item No. 76999 ..... \$4.80**  
 Handy bushing storage box is available separately.

## Body Dies

Redding has been making Body Dies for Benchrest Shooters for years, but they were never a cataloged item.

Now, with the introduction of the Bushing-Style Neck Sizing Dies, they are available as a companion item for most cartridges.

Body Dies are designed to full length resize the case body and bump the shoulder position for proper chambering without disturbing the case neck. They are made without internal parts and intended for use only to resize cases which have become increasingly difficult to chamber after repeated firing and neck sizing.

- Category I ..... \$45.60
- Category II ..... 56.20
- Category III ..... 69.00

For ordering numbers, see pages 8 & 9

U.S Patent No. 5,649,465

**The revolutionary Competition Neck Sizing Die with interchangeable bushings brings an advanced level of precision to Competition Shooters.**

### — Tech Talk —

#### Bushing Selection and Use

The easiest way to determine the proper diameter bushing, is to measure the neck diameter of several loaded or dummy cartridges with an accurate micrometer. Subtract .001"-.002" from the average neck diameter and this diameter bushing will generally size case necks to create the proper press fit for the bullet.

**Note:** If the neck wall thickness of your cases is on the thin side of the SAAMI tolerance, your fired case necks will measure considerably larger (.006-.010" larger) than your loaded cartridges. Under these circumstances, our tests have shown that a bushing .001" larger may give the desired results.

Another method is to measure the neck thickness with a ball micrometer. Double the neck wall thickness and add this number to the bullet diameter. The result is the neck diameter of a loaded cartridge, and bushing size can be determined as above.

After loading several cases, it's a good idea to test the neck's grip on the bullet. The simplest method is to push the bullet in a loaded cartridge against the edge of your reloading bench with moderate hand pressure. The bullet should not move easily in the case neck. If the bullet pushes deeper in the case, select the next smaller bushing and start again.

When using your bushing die, we have found that lubricating case necks and installing the bushing numbers down may improve results. Many reloaders like to adjust the die to size 1/2 to 3/4 of the case neck. This has been shown to improve accuracy in some instances.

**Note: For the ultimate shoulder bump control, use these dies with our new Competition Shellholders. See page 15 for details.**

# Competition Bullet Seating Die

**“No seating die on the market is built to this level of precision.”**

This patented design quickly established itself as the “state of the art” in straight line bullet seaters and beat the concentricity problems inherent in all other seating dies of this type.

Tighter manufacturing tolerances were made possible due to the details of the floating seating stem system. The bullet guide to seating stem fit is so precise that the seating stem can actually be demonstrated to “float” on a column of air. The seating stem is precision ground to exactly match bullet diameter.

No seating die on the market is built to this level of precision.

Alignment and accuracy are enhanced by the cartridge case and bullet being completely supported and aligned in a close fitting, precision ground sleeve before the bullet seating begins.

The micrometer is calibrated in .001" increments for precise seating depth and is infinitely adjustable. The micrometer also has a feature that allows you to re-set it to your favorite seating depth.

For ordering numbers see chart below.

**Category I . . . . . \$172.00**

# Rifle & Handgun Die Sets

The quality and accuracy of your reloaded ammunition depends largely on the quality of the equipment you use to assemble it.

Your choice of reloading dies should not be a casual one. Your dies literally shape the quality and function of your reloads. Because they are so important, we give them a lot of attention.

- We use the finest alloy steels obtainable.
- Our dies are machined on Hardinge Super-Precision® lathes capable of holding the tightest tolerances in the industry.
- We guarantee our dies to produce ammunition that will properly fit any standard (SAAMI) chamber, regardless of action type.
- To maintain tolerances and guarantee that your dies will last a lifetime, they are heat treated in atmospherically controlled furnaces.
- All dies are hand polished for smooth, flawless functioning, inspected, and are ultrasonically cleaned before packaging.
- The die box is a handy cartridge loading block and storage package. Inside is a spare decapping pin, hex wrench, and a place for your shellholder!
- All Redding dies use the industry standard 7/8-14 threaded bodies.

On the following pages you will find many products that are uniquely Redding. Most have evolved by listening to the needs and desires of our customers and helping them solve specific problems.

The design of our Profile Crimp Die is an example that came about from an attempt to help silhouette shooters solve the typical “half moon” crimp so prevalent with magnum handgun cartridges. Our solution to the problem not only solved the ugly, half crimp, but proved to tighten groups as well.

## Full Length Die Sets For Bottleneck Cases

Full length die sets for bottleneck cases contain two dies. The full length (FL) resizing die contains a decapping rod assembly with a neck expander (size button). The seating die (ST) includes bullet guide, built-in crimp ring and the proper seating plug.

## Neck Die Sets For Bottleneck Cases

Neck die sets for bottleneck cases contain two dies. The neck (NK) resizing die contains a decapping rod assembly with a neck expander (size button). The seating die (ST) includes bullet guide, built in crimp ring and the proper seating plug.

## Deluxe Die Sets For Bottleneck Cases

Deluxe die sets for bottleneck cases contain three dies. They are a special packaging of our full length die sets (described above) with the addition of a neck (NK) sizing die.

## Die Sets For Straight Wall Cases

Die sets for straight wall cases contain three dies. This is necessary because it is not possible to full length resize straight wall cases and expand the neck for proper bullet fit in one operation. The full length (FL) resizing die contains a decapping rod assembly. The expander die (EXP) contains a neck expanding plug. The seating die (ST) includes bullet guide, built-in crimp ring and the proper seating plug.

## Seating Dies With Taper Crimp

Reloading dies for handgun calibers that headspace on the case mouth are indicated with a ♦. The seating dies in these calibers are made with a taper crimp. All other calibers have the standard roll crimp. Recent tests have shown that seating the bullet to its proper depth and crimping as a separate operation will produce the best accuracy. See page 15 for additional information on crimp dies.

# SERIES A - Rifle & Handgun Dies

The Reloading die sets listed in this category represent the most popular dies that we produce. Although all Redding Dies are made to the same high quality standards, Series A is the lowest price, due to the efficiency of higher production . . . . \$75.20

## "E-Z Feed" Shellholders

New tapered design allows easy case entry. Machined to very close tolerances to fit your cases perfectly and eliminate potential problems. The universal design fits all popular presses. Only Redding shellholders are heat treated and have outside knurling to make them easy to handle and change. See Reference Charts on pages 20, 21 & 22 for proper size.

**ITEM NO. 110XX** (specify shellholder #) **\$14.10**

## "E-Z Feed" Shellholder Sets

This set consists of six of the most popular shellholders in a handy storage box. Contains Shellholders #1, #6, #10, #12, #18 & #19.

See Reference Charts on pages 20, 21 & 22 for shellholder usage.

**ITEM NO. 11900** ..... **\$76.50**

Shellholder storage box also available separately

**ITEM NO. 11699** ..... **4.80**

## Carbide Size Button Kits

Make inside neck sizing smoother and easier without lubrication. Now you can upgrade your die sets with a carbide size button kit.

Available for bottleneck cartridges 20 thru 338 cal. The carbide size button is free floating on the decap rod allowing it to self-center in the case neck. **Kits contain: carbide size button, retainer and spare decapping pin.**

**These kits also fit all Type-S dies \$45.70**

Kit No. 47203	.....	.20 cal.
Kit No. 48223	.....	.22 cal.
Kit No. 48242	.....	.6MM
Kit No. 48256	.....	.25 cal.

Kit No. 49276	.....	.270 cal.
Kit No. 49283	.....	.7MM
Kit No. 49307	.....	.30 cal.
Kit No. 49337	.....	.338 cal.

See chart on pages 8 & 9 for Competition Neck Sizing Die Carbide Kit item numbers

## Taper Crimp Dies

Designed for handgun cartridges which headspace on the case mouth where conventional roll crimping is undesirable.

Also available for some revolver cartridges for those who prefer the uniformity of a taper crimp.

See pages 11 thru 14 for availability.

Also see page 17 for available Rifle cartridges.

Series A	<b>\$40.40</b>	Series B	<b>\$48.90</b>
Series C	<b>61.70</b>	Series D	<b>68.50</b>

## Profile Crimp Dies

These handgun cartridge crimp dies were designed for those who want the best possible crimp. Profile crimp dies provide a tighter, more uniform roll type crimp, and requires the bullet to be seated to the correct depth in a previous operation. These dies are not for cartridges that headspace on the case mouth.

Series A	<b>\$40.40</b>	Series B	<b>\$48.90</b>
Series C	<b>61.70</b>	Series D	<b>68.50</b>

## Special 45-70 FTX Profile Crimp Die

A special Profile Crimp Die designed for the 45-70 FTX due to its shorter case length.

**ITEM NO. 86262** ..... **\$48.90**

## Tapered Size Buttons

These long tapered expanders (size buttons) are made for expanding the necks of bottleneck cartridges up to the desired size.

Tapered size button only **\$ 19.20**

Decapping rod assembly with tapered size button, **specify cartridge \$ 27.60**

## Trim Dies

Redding trim dies allow you to file trim your cases without unnecessary resizing. Other manufacturers use sizing die dimensions, forcing you to full length resize when trimming. For case forming and necking brass down from another caliber, Redding trim dies can be the perfect intermediate step before full length resizing. Pistol trim dies require extended shellholders. Refer to die charts for available calibers and the extended shellholders required. See our case forming section on page 23.

Series A	<b>\$ 45.60</b>	Series B	<b>\$ 61.60</b>
Series C	<b>77.00</b>	Series D	<b>85.00</b>

## Universal Decapping Dies

**Decapping dies allow you to deprime and clean your cases prior to sizing.**

The small decapping die will handle 22 thru 50 caliber cases with lengths up to 2.625". An optional decapping rod for this die is designed to work with all 17 caliber cases and will accommodate the small .060" flash holes found on the BR and PPC cases. For longer case lengths up to 3.0" use the large decapping die.

**Note: the large die will not accommodate a neck diameter of less than 25 caliber.**

**ITEM 69100** Small decapping die ... **\$27.60**

**ITEM 69200** Large decapping die ... **27.60**

**ITEM 69250** Optional 17 caliber rod .. **14.00**

Complete kit containing all of the above items

# New! Premium Series Die Sets

Featuring a Carbide Size Button in the full length sizing die and the Bullet Seating Micrometer on the seating die.

Following the introduction of Bullet Seating Micrometers for our standard series of seating dies, our customers have been asking for complete die sets with this added precision.

We have now added two popular upgrades to a select group of "Series A" dies to create the new "Premium" Series Die Sets.

The upgrades include combining a **Carbide Size Button** in the full length sizing die and the **Bullet Seating Micrometer** on the seating die.

**Two types of "Premium" Die Sets are available.**

The **"Premium" Full Length**, two (2) die set; contains a carbide Size Button in the full length sizing die and the Bullet Seating Micrometer on the seating die.

**See Chart for availability . . . \$144.00**

The **"Premium" Deluxe**, three (3) die set; contains the "Premium" two (2) die set (described above) with the addition of a standard Series A neck sizing die.

**See Chart for availability . . . \$186.00**

## Bullet Seating Micrometers

Redding's **Bullet Seating Micrometers** were created for use on all standard Redding seating dies using 1/2-20 threads.

They provide a direct replacement for the original seat plugs and can easily be changed from one die to another.

These Bullet Seating Micrometers are available for both traditional (STD) bullet shapes as well as the new VLD bullets.

**Not for use with our Competition Seating Dies.**

See chart for ordering nos. . . . \$54.00

## Carbide Size Button Kits

Make inside neck sizing smoother and easier without lubrication.

Now you can upgrade your die sets with a carbide size button kit. Available for bottleneck cartridges 20 thru 338 cal. The carbide size button is free floating on the decap rod allowing it to self-center in the case neck.

**See Page 15 for available sizes and ordering numbers**

# Master Hunter Die Sets

## With the extraordinary Competition Seating Die

The Master Hunter Die Sets were inspired by and requested as a result of the success of our National Match Die Sets.

Experienced hunters know that full length resizing is important when a high stress follow-up shot is needed in the "real world" of Hunting.

As a result, the upgraded Master Hunter Die Sets combine the standard Redding Full Length Sizing Die with the extraordinary Redding Competition Seating Die enabling you to make the best possible ammunition for your favorite hunting rifle.

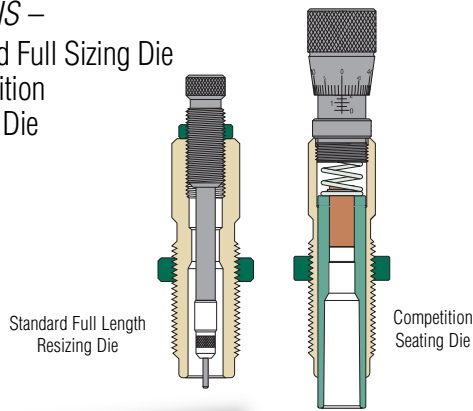

See chart for available cartridges . . . . . **\$206.00**

# National Match (NM-C) Die Sets

*New!* Now supplied with carbide size buttons

The success of our specialized National Match Die Sets has created the demand for us to offer additional options beyond the limits of sanctioned cartridges to meet the needs of other precision oriented AR platform shooters.

The name change (NM-C) indicates that all of our National Match Die Sets are now supplied with carbide size buttons. The sets include: a full length Sizing Die with carbide size button, the Competition Bullet Seating Die and a Taper Crimp Die.

Category I . . . . . **\$269.00**    Category II . . . . . **\$299.00**

- Standard Full Sizing Die with Carbide Size Button
- Competition Seating Die
- Taper Crimp Die

**Note: For the ultimate shoulder bump control, use these dies with our new Competition Shellholders. See page 18 for details.**

— Tech Talk —

### Create A "Custom Die" With A Simple Shellholder Change!

To maximize case life and the accuracy potential of your reloads, it's desirable to size fired cases the minimum amount that allows loaded cartridges to chamber freely.

Most hunters and many other shooters seeking smooth chambering reloads, full length size their cases each time. Since the interior dimensions of sizing dies are determined by the manufacturer, adjusting the *shoulder setback* is the only control a reloader has over how much a fired case is sized.

In the past, sizing die adjustment has been made through the trial and error method of adjusting the die body in the reloading press. While acceptable results can be obtained using this method, precise adjustments were difficult at best.

Using this method, firm contact with the shellholder (squaring the die) was not always possible. As a result, irregularities in brass hardness and thickness, as well as the uniformity of case lube affected shoulder setback. The resulting headspace variations created can adversely affect accuracy.

To provide desirable shellholder-to-die contact during sizing, without excessively setting the case shoulder back, Redding now produces shellholders that are made in increments of .002" deeper than the industry standard. The nominal industry standard depth (dimension X) for shellholders is .125". The new Competition Shellholder Set includes five shellholders that are deeper than this in increments of .002". Therefore, the set includes shellholders that are marked +.002, +.004, +.006, +.008 and +.010, which is the amount the shellholder will *increase* base to shoulder case length and thus *decrease* shoulder set back and case to chamber headspace.

To select the proper shellholder for your particular firearm's chamber, simply start with the shellholder marked +.010. The shellholder should be adjusted to make firm contact with the bottom of the sizing die during the case sizing operation. Resize a case and try it (unprimed and empty) in the chamber of your firearm. If the empty case does not chamber or chambers with difficulty, switch to the shellholder marked +.008 and repeat the process. Stop at the shellholder that allows the firearm's action to close freely. Your cases are now being sized properly to fit your chamber with a minimum amount of headspace.

## Make any die a custom die! Competition Shellholder Sets

**Now you can control headspace.** The new Redding Competition Shellholders are packaged in five piece sets in .002" increments (+.002", +.004", +.006", +.008" and +.010"). Each shellholder has a distinct black oxide finish and is clearly marked to indicate the amount it will **decrease** case-to-chamber headspace. You can now easily adjust the shoulder bump to customize cases to your specific chamber.

**ITEM NO. 116XX** (5 pc. set includes storage box) . . . . . **\$81.90**

Shellholder storage box also available separately.

**ITEM NO. 11699** . . . . . **\$4.80**

Competition Shellholder Sets now available in the following sizes: #1, 2, 4, 6, 7, 10, 12, 18 & 35

For order No., replace XX with shellholder number from charts on pages 20, 21 & 22.

## Special Small Base Body, Full Length & Type S – Full Length Dies

Now available in the following calibers for firearms with custom chamberings that are tighter than SAAMI specifications.

**Note: For the ultimate shoulder bump control, use these dies with our new Competition Shellholders. See above for details.**

## "Custom Series" Dies . . . . . "Custom Series" Dies Prices

Our Series "C" and "D" listings contain many obsolete and wildcat cartridges normally considered custom by other manufacturers. We try to maintain limited quantities of factory inventory on "Custom Series" Dies listed in this catalog on pages 16 thru 18. "Custom Series" Die prices are shown at the right.

- Custom Two Die Sets . . . . . \$ 195.70 \*
- Custom F.L. Sizer or Neck Sizer . . . . . \$ 127.30 \*
- Custom "Type S" Neck or F.L. Sizer . . . . . \$ 173.00 \*
- Custom "Type S" Neck Die Set . . . . . \$ 333.70 \*
- Custom Deluxe Die Set . . . . . \$ 309.00 \*
- Custom Three Die Set (straight wall cases) \$ 210.00
- Custom Seating Die . . . . . \$ 109.80
- Custom Taper Crimp Die or Body Die . . . . \$ 89.10
- Custom Form Die . . . . . \$ 89.10
- Custom Form and Trim Die . . . . . \$ 110.40
- Special Price Group (\*) . . . . . \$ 216.80

\* Add \$8.50 for Tapered Size Button

### Special "One Off" (one of a kind) Custom Dies

Any custom dies (not listed in this catalog) are considered non series or "One Off" (one of a kind) Custom Dies and are priced in a manner reflecting the direct cost associated with their design and manufacture. To purchase "One Off" Custom Dies you will be required to supply the chamber reamer drawing for your cartridge or five (5) fired cases from your chamber in order for us to provide an accurate design. All "One Off" Custom Dies must be fully paid for at the time of your order by check or money order (credit cards are not accepted). You must call, write or e-mail for a price quotation on any "One Off" Custom Die. Since these items are not run on a standard production basis, lead time will be a minimum of 16 weeks after receipt of payment.

Redding reserves the right to decline production of any die or die set which the company feels may produce a cartridge case with inherent design flaws or safety concerns.

Designed specifically for shooters who are seeking the utmost in accuracy from their handloads.

## Instant Indicator Headspace and Bullet Comparator

This instrument provides an extremely quick method for comparing bullets, seating depths, fired cases, sized cases, trim lengths and loaded ammunition for uniformity.

Easily perform any of the following tasks.

- Sort bullets for uniformity
- Sort cases fired in two or more rifles
- Sort sized cases for uniformity
- Compare sized cases to fired cases to determine the amount of headspace
- Set up sizing die correctly \*
- Check uniformity of shoulder bump
- Check bullet seating depth uniformity
- Check trim length uniformity

Supplied with one bore diameter bushing, surface contactor, shoulder contactor, headspace gauge and complete instructions..

<b>"Instant Indicator" w/Dial Indicator</b>	<b>ITEM NO. 27XXX</b>	<b>..... \$197.80</b>
<b>w/o Dial Indicator</b>	<b>ITEM NO. 17XXX</b>	<b>..... 153.00</b>
<b>1" Dial Indicator</b>	<b>ITEM NO. 17999</b>	<b>..... 50.00</b>

\*Tip - the easiest and most repeatable sizing die adjustment can be made with our new competition shellholders. See page 18.

# Popular Case Forming Dies

Case forming dies are made on a custom basis for those who wish to form brass cases from one caliber to another. Most case forming is done to produce ammunition that is not factory available. All wildcat cartridges and many obsolete calibers fall into this category. Case forming dies are designed to change the shape of the original parent case in small increments to avoid overworking the brass and to prolong case life. After using the proper form dies and/or Form & Trim Die, full length resizing is required.

Below are a few examples of commonly formed cartridges listed with their parent case and the forming dies that are required. We make many others and they all come with complete, easy to follow instructions. If you need to form a caliber that is not listed, simply write us or call explaining what you would like to do.

**NOTE: Full length resizing is a necessary final operation after all case forming to insure proper chambering.**

# Model No. 2 Powder & Bullet Scale

The Redding Model No. 2 Powder & Bullet Scale has been designed and manufactured with the utmost attention to accuracy and sensitivity standards. All Redding scales are individually hand calibrated, tested and adjusted to U.S. Bureau of Standards Approved Master Weights, and guaranteed accurate to less than 1/10 grain!

The Model 2 scale includes a magnetically dampened beam swing for extra fast readings. Hardened and ground knife edges ride in precision milled stainless steel bearing seats that will not crack, chip or lose their alignment.

Its pour spout pan and flat pan platform provide the convenience of an electronic scale with the accuracy and sensitivity of a laboratory beam scale.

**ITEM NO. 02000 Master Powder and Bullet Scale . . . \$140.10**

## Features and Advantages:

- Lifetime Guarantee.
- Magnetically dampened beam.
- 505 grain capacity
- 1/10 grain accuracy.
- Convenient pour spout pan.
- Simple two counterpoise system.
- 1/10 grain over/under graduations.
- More confidence than with electronic scales.
- Better long-term sensitivity and accuracy.
- No reading drift due to temperature, battery or other conditions.
- Quicker start - no warm up.
- No batteries or electronics to fail.

*The graduated plate at the beam pointer is marked in 1/10 grain increments for easy reading of over or under charges. This eliminates the need to move the counterpoises to check powder charge variations — **you know the exact weight!** All other so-called reloading scales on the market today have only a zero or meaningless marks if any at all.*

### *We invite you to test the Redding Model 2 Scale!*

*Put it side by side with any competition regardless of price. Using tweezers, drop one or two granules of powder into the pan and watch the scale beam pointer react, then do the same with our competition. Next, zero the scale properly and move the small 1/10 grain counterpoise 3/10 grain. Watch the scale beam pointer move to an indication of -3/10 grain. Try this with any of our competition.*

## Model No. 5 Powder Trickler

Turn the knob and you add powder to the scale pan a granule or two at a time. Brings underweight charges up to accurate readings fast. Solid, stable, low center of gravity.

A full pound of solid steel – it won't squirm all over your bench! Ideal height for most powder scales.

**NO. 05000 . . . \$36.60**

**Time proven accuracy and reliability**

# The "Classic" Model 3 Powder Measure

The **Original Classic Model 3**, time proven for accuracy and reliability. It has a micrometer metering chamber right in front for easy setting and reading. The micrometer makes it possible to record your favorite settings and return to the same place weeks later when you wish to create the same load.

Precision machined cast iron frame to give you years of service.

All Redding Powder Measures feature hand honed frames and hard chromium drums for long life. An extremely sharp cutting surface easily cuts and meters even the most difficult powders.

**ITEM NO. 03000 Powder Measure** with Universal Metering Chamber, Charging range approx. 5 to 100 grains . . . . \$209.10

**ITEM NO. 03200 Powder Measure Model 3K**, Includes both Metering Chambers . . . . . \$253.40

**ITEM NO. 03313 Handgun Metering Chamber** (Fits only Model 3 Measures) Charging range approx. 0 to 10 grains . . . . . \$57.20

**IMPORTANT**  
Redding Powder Measures Are Not Intended For Use With Black Powder!

## Features:

- Cast mounting bracket included with all Redding Powder Measures.
- Clear powder reservoir.
- Clear "See thru" drop tube accepts all calibers from .22 thru .45 cal.
- Body has standard 7/8"-14 thread to fit mounting bracket and optional bench stand with locking ring for fast dumping.

# Competition LR-1000 Long Range Powder Measure

The popularity of large capacity cartridges like the 338 Lapua Mag. and others have pushed standard powder measures to their limits. Redding has responded by using over 40 years of benchrest experience to develop a dedicated measure for the long range precision shooter.

**ITEM NO. 03800 LR-1000 Powder Measure . . . . . \$312.10**

## Competition LR-1000 features

- Dedicated large capacity – approx. 25-140 grains.
- Anti-Backlash micrometer provides repeatable settings.
- "See thru" drop tube – accepts .30 to .45 cal.
- Accepts .22 thru .30 cal with **included** #03814 adapter.
- Extra capacity powder reservoir with adjustable baffle.
- Special operating handle – can be configured for up or down stroke, right or left operation.

**ITEM NO. 03814 Drop Tube Adapter . . . \$13.30**  
.22 thru .30 caliber for LR-1000 Powder Measure. Simple slip-fit over existing drop tube.

**ITEM NO. 03815 Drop Tube Adapter . . . \$13.30**  
.50 caliber for LR-1000 Powder Measure. Simple slip-fit over existing drop tube.

*Benchrest proven hemispherical metering chamber cavity.*

**Our most versatile powder measure... Competition proven with a broad range of charging capacity.**

*The Competition style operating handle is supplied with all Model 3BR powder measures*

**There are no aluminum parts to wear out in a Redding Powder Measure!**

# Match-Grade Model 3BR Powder Measure

The Match-Grade Model 3BR was created to be the ultimate powder measure... "out of the box" match ready! Since its creation this powder measure has been helping Silhouette shooters and Benchrest shooters win matches and set new records.

It all started with the time proven accuracy and reliability of the original Model 3 Powder Measure. The Model 3BR Powder Measure utilizes all of the features of the original Model 3 and to that we added the conversion features that Benchrest shooters were looking for.

It quickly became our most popular powder measure for two very good reasons . . . Its broad range of charging capacity and its performance record.

**ITEM NO. 03500 Match-Grade Powder Measure 3BR**  
with Universal Chamber, Charging range approx.  
5 to 100 grains . . . . . \$264.70

**ITEM NO. 03700 Match-Grade Powder Measure 3BRK**  
Includes both metering chambers . . . . . \$325.00

**IMPORTANT**  
**Redding Powder Measures Are Not Intended For Use With Black Powder!**

**ITEM NO. 03817 Drop Tube Adapter**  
Fits all Redding Powder Measures and Funnels with a Simple slip-fit.  
For .17 & .20 caliber . . . . . \$13.30

## Competition Proven Conversion Features...

Now used on the Match-Grade Model 3BR and both Competition Powder Measures, the Model BR-30 and 10X Pistol/Small Rifle.

**ITEM NO. 03331 Handgun Metering Chamber**  
(Fits only 3BR Measures) Charging range approx. 0 to 10 grains . . . . . \$ 75.60

**ITEM NO. 03330 Universal Metering Chamber**  
(Fits only 3BR Measures) Charging range approx. 5 to 100 grains . . . . . \$ 75.60

**ITEM NO. 03018 Powder Measure Mounting Bracket**  
(shelf bracket fits all Redding powder measures).  
. . . . . \$ 24.40

**ADJUSTABLE POWDER BAFFLE**  
To create exceptional uniformity from charge to charge we have placed an adjustable powder baffle above the metering chamber. This maintains a constant amount of powder above the metering chamber regardless of the level of powder in the reservoir.

**POSITIVE LOCK**  
When the micrometer adjustment lock screw (opposite side) is loosened to change settings, the micrometer body cannot move, since the micrometer is held in place by a separate lock screw. In a measure this precise, there is no room for error and nothing can be left to chance.

**PRECISION MICROMETER**  
A special micrometer is used in all Match-Grade and Competition Powder Measures that eliminates backlash in the screw threads. Your settings will be fast, accurate and exactly repeatable.

**Designed specifically for Benchrest Competition.**

# Competition Model BR-30 Powder Measure

The Competition Model BR-30 Powder Measure is truly a competition model with some very special features. One of these features (the drum and micrometer) limits the overall charging range from a low of 10 grains (dependent upon powder density) to a maximum of approximately 50 grains.

As a result we do not expect this model to be the proper choice for everyone. If, however, you are a serious competitive shooter and your loading requirements are generally between 10 and 50 grains, this is certainly the measure to choose.

This measure uses all of the competition proven features of the Match-Grade Model 3BR. To achieve the most uniform powder metering possible for Benchrest Competition, at a targeted charge weight of approximately 30 grains, (hence the name BR-30) an entirely new drum and metering unit was created. The diameter of the metering cavity was reduced and the metering plunger was given a unique hemispherical or "cup" shape. This shape creates a powder cavity that resembles the bottom of a test tube to alleviate irregular powder settling and to enhance charge to charge uniformity.

A special operating handle was also created for this model. It's a rotating handle, slightly heavier to help you maintain a more uniform stroke.

**ITEM NO. 03300 Competition Model BR-30 Powder Measure . . . . \$312.10**

*New!* **ITEM NO. 03818 Drop Tube Extension**  
4-1/2" extension fits all Redding Powder Measures and Funnels. Simple slip-fit over existing drop tube. For .22 thru .30 calibers . . . . . **\$19.80**

### — 17 Hornet News —

The Competition Model 10X Powder Measure was designed for the optimum charge weight of the new 17 Hornet. Simply add the No. 03817 Drop Tube Adapter, shown on the opposite page, for direct charging.

**Designed specifically for handgun and small capacity rifle cartridges.**

# Competition Model 10X Pistol & Small Rifle Powder Measure

This powder measure uses all of the special features of the Competition Model BR-30 combined with an entirely new drum and metering unit designed to provide the most uniform metering of small charge weights.

To achieve the best metering possible at the targeted charge weight of approximately 10 grains, the diameter of the metering cavity was reduced and the metering plunger was given the unique hemispherical cup shape of our successful Model BR-30. The result is a very specialized small capacity powder measure with a charge weight range of approximately 1 to 25 grains.

**ITEM NO. 03400 Competition Model 10X Powder Measure . . . . . \$312.10**

**Shown with  
Optional  
Bench Stand  
and Clamp  
...see page 37**

**IMPORTANT  
Redding Powder  
Measures Are  
Not Intended  
For Use With  
Black Powder!**

**The T-7 combines strength, power and convenience with the speed and versatility of a turret press.**

Rear casting support assures a rigid turret and precise alignment.

**Features:**

- Seven station turret head with operating handle
- Heavy duty cast iron frame for strength and wear resistance
- Powerful compound linkage with positive ram stop.
- 1" diameter ram
- 4-3/4" press opening
- 3-13/16" ram stroke
- Ball handle
- "Spent primer collection system"
- Accepts all standard 7/8"-14 threaded dies and universal shell holders
- Shellholders may be rotated to any comfortable position desired
- "Smart" primer arm for seating small and large primers
- Interchangeable turret heads
- Competition die compatible

Shown with optional "Slide Bar Automatic Primer Feeder System".

**"Cast iron construction, powerful compound linkage and a rigid seven station turret combine to make the Redding T-7 the best turret press ever!"**

## The T-7 Turret Reloading Press

The design criteria was to create the ultimate turret press. Our engineering team started with our time proven cast iron construction and turret support that is second to none. They added powerful compound linkage with over 3.8" of ram travel. A 1" diameter hollow ram was chosen with the "smart primer arm" and "spent primer collection system" borrowed from our Ultramag. Another station was added to the turret for even greater versatility and an optional "Slide Bar Automatic Primer Feeding System" was designed.

After adding a few more subtle refinements and built with the precision you would expect from Redding, we're confident this is the best turret press ever.

**Shown with optional "Slide Bar Automatic Primer Feeder System". Also fits the new Big Boss Press. See below for details.**

**ITEM NO. 67000 . . . . . \$491.30**

**Buy the Kit, Save 25% on Dies and Shellholder**

**Also available in kit form: Includes press, shellholder, and your choice of any Series "A" full length die set. ITEM NO. 67XXX . . . . . \$558.30**

**For Order No., replace XXX with the last three numbers from the Series "A" dies, see chart on page 9.**

### Optional Slide Bar Automatic Primer Feeding System

Eliminates handling of primers, and speeds-up reloading operations. Comes complete with individualized tubes for both large and small primers. Capacity: approximately 100 primers. Fits the T-7 and Big Boss Presses.

**ITEM NO. 99600 . . . . . \$72.10**

### Extra Slide Bar Primer Arm Assembly

This item allows you to quickly change primer cup & pin sizes by simply replacing the slide bar assembly on your Automatic Primer Feeder. Includes slide bar, knob, spring and large & small primer cup assemblies.

**ITEM NO. 99585 . . . . . \$26.50**

These top of the line single station presses have the largest window opening and longest usable ram stroke of any in their class.

## The Big Boss II and original Big Boss Reloading Presses

Both the original Big Boss and the new Big Boss II reloading presses have all the desirable features of the "Boss" reloading press, but are built on heavier frames with a 1" diameter ram and longer 3.8" usable ram stroke for reloading the largest magnum cartridges.

The Big Boss II now features the unique Redding "Spent Primer Collection System" used on the T-7 and Ultramag presses. This top of the line single station press has the largest window opening and longest usable ram stroke of any press in its class. Simply, the only press you will ever need!

ITEM NO. 97000 Big Boss II . . . . . \$315.20

ITEM NO. 79000 Big Boss . . . . . \$282.70  
(Original Big Boss Press is supplied with "Boss" style primer catcher.)

ITEM NO. 97601 Big Boss II ram only . . \$55.60

Buy the Kit, Save **25%** on Dies and Shellholder

Also available in kit form: Includes press, shellholder, and your choice of any Series "A" full length die set.

ITEM NO. 97XXX Big Boss II . . . . . \$382.20

ITEM NO. 79XXX Big Boss . . . . . \$349.70

For Order No., replace XXX with the last three numbers from the Series "A" dies. see chart on page 9.

Optional bushing for 1"-14 threaded dies

ITEM NO. 70030. . . . . \$26.50

### "Spent Primer Collection System"

Spent primers automatically drop through the large diameter hollow ram into a handy flexible plastic tube that can hold hundreds of spent primers before emptying, or be easily routed to your trash container.

### "Smart Primer Arm"

"Smart" primer arm automatically swings into position during the ram stroke and flips out of the way when not in use. For maximum sensitivity at the lowest possible leverage, priming is done at the end of the ram stroke.

**The Big Boss II –**  
Now featuring the unique Redding  
"Spent Primer Collection System"  
used on the T-7 and Ultramag presses.

### Features:

- "Spent primer collection system"
- 1" diameter ram
- Heavy duty cast iron frame with 36° offset for easy access and visibility
- Large 4-1/2" frame opening
- 3-13/16" of ram stroke for easy reloading of magnum cartridges
- Offset/straight pull ball handle for ease of operation
- "Smart" primer arm that moves in and out of position with ram travel
- Heavy duty compound linkage
- Steel adapter bushing accepts all standard 7/8"-14 threaded dies and is removable for use with oversized dies
- Frame with bushing removed accepts 1-1/4" - 12 dies

**The Quality of Cast Iron at  
The Price of Aluminum!**

# The Boss Reloading Press

Here is the press that has all the features reloaders look for. It's cast iron construction insures that it will last a lifetime, yet it is priced with light-duty aluminum presses! The BOSS is powerful, remarkably easy to use, and yet sensitive enough to seat primers without crushing them.

Take a look at all the features The BOSS offers and you'll be convinced...when it comes to "O" Type reloading presses, this one is truly a smart choice.

**ITEM NO. 72100 . . . . . \$224.00**

**Buy the Kit, Save  on Dies and Shellholder**

**Also available in kit form: Includes press, shellholder, and your choice of any Series "A" full length die set.**

**ITEM NO. 72XXX . . . . . \$291.00**

For Order No., replace XXX with the last three numbers from the Series "A" dies, see chart on page 9.

*"My accomplishments with Redding products" — Charles Ballard*

## Features:

- Rigid cast iron frame
- 36° frame offset gives the best visibility and access of all comparable presses
- "Smart" primer arm automatically moves in and out of position with ram travel. Priming arm is positioned where it should be...at the bottom of ram travel for the lowest leverage and best feel
- Offset handle is in the most comfortable operating position yet out of the way for best access and visibility
- Positive ram travel stop
- Powerful compound linkage
- 3 holes for rigid mounting
- Accepts all standard 7/8"-14 threaded dies and universal shellholders
- Shellholders may be rotated to any comfortable position desired
- Includes primer catcher

- Aug. 2007 Set National Record-F-Class Open 15 shot 600 yards 149-7x (300WSM)
- Aug. 2007 Set National Record-F-Class Open 15 shot 1000 yards 148-4x (300WSM)
- Won 2008 North Carolina F-Class State Championship
- Won 2008 NRA Long Range Regional Championship (F-Open Div.)
- June 2008 Set World Record F-Class Open 20 shot 1000 yards 200-13x
- Won 2008 NRA United States F-Class National Championship
- Oct. 2008 Set National Record F-Class National Championship Grand Aggregate Score 1337-65x
- Won 2009 NRA Long Range Regional Championship (F-Open Div.)

- Won 2009 Spirit of America- Fullbore National Championship (F-Open Div.)
- Won 2009 North Carolina State F-Class Championship
- Won 2009 US F-Class National Championship

## Ball Handle Conversion

Convenient, easy-to-attach conversion for those who prefer a ball handle on their reloading press. Fits the Redding BOSS and other reloading presses that use a 5/8" handle diameter. Easily attaches without machining or threading.

**ITEM NO. 99175 . . . . . \$11.40**

**“The largest and strongest press available for the toughest reloading chores...”**

*(HANDLOADER Magazine, No. 148)*

## **The Ultramag Reloading Press**

At first glance you will see what sets the ULTRAMAG apart from all other reloading presses: the unique location of its compound leverage system. Unlike other reloading presses which connect the linkage to the lower half of the press, the ULTRAMAG'S leverage system is connected to the top of the press frame. This allows you to develop literally tons of pressure without the usual concern about press frame deflection or misalignment.

The ULTRAMAG features a huge 4-3/4" frame opening and 4-1/8" of usable ram stroke, making it ideal for loading oversized cartridges such as the old Sharps "Buffalo Cartridges" and British "Nitro-Express" rounds.

Its unique long link compound leverage system has more mechanical advantage over a greater distance than any other reloading press on the market. This makes "childs play" of difficult case forming operations.

**ITEM NO. 70000 . . . . . \$510.00**

**Buy the Kit, Save  25% on Dies and Shellholder**

**Also available in kit form: Includes press, shellholder, and your choice of any Series "A" full length die set.**

**ITEM NO. 70XXX . . . . . \$576.80**

**For Order No., replace XXX with the last three numbers from the Series "A" dies, see chart on page 9.**

**• Optional bushing for 1" - 14 die threads is also available.**

**ITEM NO. 70030 . . . . . \$26.50**

### **“Smart Primer Arm”**

“Smart” primer arm automatically swings into position during the ram stroke and flips out of the way when not in use. For maximum sensitivity at the lowest possible leverage, priming is done at the end of the ram stroke.

### **“Spent Primer Collection System”**

Spent primers are automatically collected in the large diameter hollow ram. They then drop into a handy flexible plastic tube that can hold hundreds of spent primers before emptying, or be easily routed to your trash container.

### **Features:**

- The frame is constructed of high grade cast iron for strength, long life and wear resistance
- Four mounting holes provide rigid mounting
- Offset handle is out of the way for all reloading operations
- All linkage pins are heat treated, precision ground and in double shear
- Steel adapter bushing accepts standard 7/8"-14 threaded dies and is removable for use with oversized dies
- Frame with bushing removed accepts 1-1/4" - 12 die threads
- "Smart" primer arm that moves in and out of position with ram travel
- "Spent primer collection system"

# Model 2400 Match Precision Case Trimming Lathe

The most noteworthy feature of the Model #2400 Case Trimming Lathe is the new Micrometer which adds precision and repeatability to the case length adjustment. Changes as little as .001" can be easily "dialed in".

The innovative new push button chuck lock simplifies loading and unloading while facilitating perfect alignment of the case and pilot. The design of the new push button chuck lock, combined with the extended cast iron frame of the Model #1400-XT, increases case length capacity; accommodating not only the latest long action cartridges but old time classics as well.

**ITEM NO. 24000 . . . . . \$274.00**

### Model 2400 features:

- New micrometer...easy adjustments of .001".
- Cast iron frame to maintain precision alignment.
- New push button collet chuck is ideally suited for use with optional power adapter.
- Handles 17 to 50 Cal, up to 3-1/4" case length.
- Universal collet fits all popular cases – no others to buy.
- TiN (Titanium Nitride) coated replaceable cutter.
- Storage holes for pilots.

# Model 1400-XT Case Trimming Lathe

The Model #1400-XT Case Trimming Lathe uses a cast iron frame that has been extended to handle all the latest long action cartridges. The frame is cast iron because it is a perfect bearing surface, will not wear out and will maintain its precision and alignment for years of service.

**ITEM NO. 14000 . . . . . \$ 158.10**

*"The New 2400 Case Trimming Lathe is another "Home-Run" for Redding. Your equipment is very well thought out."*

**Rich Maretzo - Precision Shooting Inc.**

**Redding "case trimming lathes" are the only case trimmers on the market that turn the case and not the cutter. This feature guarantees a perfectly square case mouth with every cut.**

**Both the Model #1400-XT and the #2400 Case Trimming Lathes are supplied with the following:**

- Universal collet fits all popular cases.
- TiN (Titanium Nitride) coated replaceable cutter.
- Six pilots - .22 cal., 6mm, .25 cal., .270 cal., 7mm and .30 cal.
- Two neck cleaning brushes (.22 thru .30 cal.)
- Large and small primer pocket cleaners.

### Model 1400-XT features:

- Cast iron frame to last a lifetime.
- Universal collet fits all popular cases – no others to buy.
- Handles 17 to 50 Cal, up to 3" case length.
- TiN (Titanium Nitride) coated replaceable cutter.
- Coarse and fine adjustments for case length.
- Storage holes for pilots.

**3/16" Shank Pilots may also be used on Hornady and Forster trimmers.**

**Universal Collet accepts all popular cases – no others to buy!**

**New replaceable (TiN) Titanium Nitride coated high speed cutters.**

**Optional Power Adapter with 1/4" hex for use with cordless screwdrivers. Works with both trimmers.**

**ITEM NO. #14025 . . . \$18.60**

**ITEM NO. 14040 TiN Cutter (17 & 20 caliber)\* . . \$ 34.60**

**ITEM NO. 14045 TiN Cutter & Shaft Complete . . 44.00**

**ITEM NO. 14050 TiN Cutter (Standard) . . . . . 34.60**

**ITEM NO. 15XXX Pilots . . . . . \$ 7.20**

**ITEM NO. 99301 Special Collet for 470 Nitro . . 25.50**

*Refer to die reference chart on pages 16, 17 & 18 for pilot number.*

*Item No. 14045 assembly fits only Model 14 & 1400 Trimmers. The Model 2400 micrometer will not fit any other Trimmer.*

32 \* Note: Our 17 and 20 caliber pilots have a 5/32" shank, therefore, our #14040 cutter will interchange with RCBS.

Possibly one of the most important tools you will ever use!

# Case Neck Gauge

Provides a quick and easy way to sort cases by neck wall thickness and uniformity. This tool allows you to accurately measure the neck wall thickness of the cartridge case and determine its uniformity, (see below Tech-Talk – Case Neck Uniformity.)

Two mandrel sizes are supplied to allow measurement of all cases from .17 cal. to .338 cal. including cases with small (.060) flash holes. For your convenience the mounting base allows direct attachment to your reloading bench, or use the Redding No. 30520 double “C” clamp (see page 41).

Pilot stops are required for each caliber (see chart below). Two pilot stops are supplied with the tool, #06121, .22 cal. and #06130, .30 cal.

**ITEM NO. 26400 Case Neck Gauge complete w/large 1” x .001” dial indicator . . . . \$143.20**

## – Tech Talk – Case Neck Uniformity

Uniformity of case neck wall thickness is an indication of the quality of the cartridge case itself. Any large variation (over .0015”) in neck wall thickness will generally indicate a similar or greater variation in the body and shoulder of the case. This variation cannot be corrected and may lead to concentricity and bullet runout problems.

Most competition shooters that have been forced to turn necks to properly fit “tight neck” chambers will confirm the following: “Turning the necks of poor quality cases will not solve the problems associated with the poor uniformity that remains within the shoulder and body of the case.”

As in all handloading practices – uniformity is the key accuracy.

Shown with new  
.17 Remington Fireball

## Primer Pocket Uniformers

Redding Primer Pocket Uniformers are precision ground carbide tools designed to cut primer pockets to a uniform depth and square to the case head.

The depth of cut is to SAAMI specifications and is controlled by a shoulder ground into the cutter that cannot change.

Available for large and small rifle primer pockets. Each cutter is supplied with an integral holder having a #8-32 threaded shank to fit the Redding #18005 accessory handle.

Unique chatterless  
5 flute design

**ITEM NO. 09100 Large Rifle Primer Pocket Uniformer**  
with accessory handle & power screwdriver adapter . . . . \$46.10

**ITEM NO. 09105 Small Rifle\* Primer Pocket Uniformer**  
with accessory handle & power screwdriver adapter . . . . \$46.10

**ITEM NO. 09110 Optional – Power Screwdriver Adapter**  
(1/4” hex O.D. with #8-32 I.D. threads) . . . . . \$4.80

**\*Note: Small Rifle Primer Pocket Uniformer is dimensionally correct for small pistol. Do not use the Large Rifle Primer Pocket Uniformer for Large Pistol.**

## Flash Hole Deburring Tools

During the manufacturing process, burrs that can cause erratic ignition are often left inside the case at the flash hole.

Redding now manufactures two different tools for removal of flash hole burrs. Both tools use pilot stops listed below.

The universal tool is for all calibers from .22 thru .338 cal. using standard (.080”) flash holes. This tool controls the cutting depth with a built-in stop that locates on the inside web of the case. A unique feature of this tool is the cross drilled hole for chip relief. Uses standard pilot stops for 3/16” mandrels.

The small tool is for .17 & .20 cal. and cases with small (.060”) flash holes. This tool *does not* control the cutting depth. The operator must control the cutting depth using the small pilot stops for 9/64” mandrels.

**ITEM NO. 06100 Universal Flash Hole Deburring Tool with handle**  
(supplied with #06130 .30 cal. pilot stop) . . . . . \$39.90

**ITEM NO. 06110 Small Flash Hole Deburring Tool with handle**  
(supplied with #06121 .22 cal. pilot stop) . . . . . \$39.90

**ITEM NO. 18005 Lg. Accessory Handle with #8-32 thread . . . \$11.10**

**ITEM NO. 06103 Sm. Accessory Handle with #6-32 thread . . \$11.10**

## Stainless Pilot Stops

Precision CNC machined stainless steel for use with the new Redding Case Neck Gauge and Flash Hole Deburring Tools.

Designed to properly fit new and resized case necks, these pilot stops feature a very unique shape. Slightly undercut, this shape will not pick up imperfections at the case mouth or neck/shoulder junction resulting in smooth accurate indicator readings when used with the new Case Neck Gauge.

Two sizes are available because of the small (9/64”) mandrels used for .17 & .20 cal. and small flash holes. The larger size (for standard 3/16” mandrels) work equally well with the tools of other manufacturers.

ITEM NO.	CALIBER	ITEM NO.	CALIBER	ITEM NO.	CALIBER

\* Pilots for small diameter 9/64” mandrels

**ITEM NO. 061XX Stainless Pilot Stop . . . . \$11.50 ea.**

# Pro-Pak Reloading Kits

## “An Investment in Quality Tools.”

We've selected our best reloading components and put them into one neat, money-saving package. This kit was created for both the first-time reloader to get started right and for the more advanced reloader desiring to upgrade his equipment.

The Boss and Big Boss Pro-Paks contain the following:

- The Boss or Big Boss Reloading Press – Our best selling presses.
- Model 2 Powder and Bullet Scale. Simply the most sensitive, most accurate scale on the market.
- Powder Trickler – Heavy stable companion to the powder scale.
- Pad Style Case Lube Kit – Consists of our non-skid lube pad and our Imperial Bio-Green case lube.
- Deburring Tool – The cutting edges are ground correctly for clean chatterless cuts.
- Model 18 Case Preparation Kit – Plastic accessory handle with all the tools and brushes you need to properly clean your fired cases before resizing.
- Powder Funnel – Made of tough Lexan® and nearly indestructible.
- Hodgdon Annual Manual – Reloading information for rifle and pistol ammo using Hodgdon, IMR & W-W powders in addition to a variety of helpful handloading articles.

### BOSS PRO-PAK

NO. 20000 . . . . . \$499.60

### BIG BOSS PRO-PAK

NO. 40000 . . . . . 555.20

### BIG BOSS II PRO-PAK

NO. 57000 . . . . . 587.10

## Reloading DVD

*Advanced Handloading – Beyond The Basics*

A perfect companion to your new Redding Reloading Equipment, this DVD guides you through the advanced techniques needed to improve the accuracy of your ammunition and is hosted by, noted handloading author, John Barsness.

ITEM NO. 05978 . . . . . \$19.95

# SAECO – a product of Redding Since 1985

Considered by many to be the finest lubricator/sizer available today.

## SAECO Lubri-Sizer

A single stroke seats gas checks, swages bullets to proper diameter, and lubricates them. The pressurized reservoir lubricates from 20 to 50 bullets between turns of the lube control handle. Parallel guide rods assure proper alignment of the top punch and sizing die, resulting in maximum bullet concentricity.

Those who prefer to shoot bullets "as cast" will appreciate the exclusive swing out gas check seater which allows the option of seating gas checks without sizing.

A combination of compound leverage and extra length operating handle substantially reduces physical effort.

**ITEM NO. 30000 . . . . . \$320.40**

*Sizing Dies and Top Punches are not included and should be ordered according to caliber and bullet design.*

## SAECO Bullet Lubricants

### SAECO GOLD – Pistol Lubricant

The original alox free formula developed by SAECO. Keeps barrels cleaner and reduces leading to a minimum for superior accuracy. Also makes an excellent fluxing agent and works equally well in rifles.

### SAECO TRADITIONAL – Rifle Lubricant

This is the NRA formula for Alox and bees wax. We use natural yellow beeswax, not synthetics. Formulated to prevent leading and improve accuracy at higher velocity levels.

### SAECO GREEN – Rifle and Pistol Lubricant

An original SAECO formula brought back. Contains no alox. Slightly harder than the other SAECO lubes.

**Available in Solid or Hollow Sticks . . . \$ 10.20**

## Top Punches

SAECO's exclusive tapered shoulder assures positive alignment with die body. A single Top Punch may be used interchangeably with several bullets of similar design. See Mould Table for top punch number . . . . . **\$25.00**

## Top Punches Lyman/RCBS Type

Straight shank type top punches designed to fit the Lyman and RCBS Lubrisizers and SAECO bullets. See mould table for "LR" top punch number. . . . . **\$25.00**

## SAECO Sizing Dies

SAECO sizing dies are made with a unique pre-lead that fits the "as cast" bullet diameter. This insures that bullets feed into the sizing diameter in absolute straight alignment. The dies are finished by internal honing known as micro-finishing which produces a mirror finish and a sizing hole that is perfectly round. Your bullets will look like polished silver with no lead shavings.

**ITEM NO. 30XXX . . . . . \$ 59.50**

**For order No., replace XXX with size from chart below.**

### DIE SIZES AVAILABLE:

.224 .225 .244 .251 .258 .265 .266 .278 .285 .286 .308 .309 .310 .311 .312 .313 .314 .321 .322 .323 .324 .325 .338 .339 .349 .354 .355 .356 .357 .358 .359 .360 .364 .365 .366 .375 .376 .377 .378 .401 .408 .409 .410 .411 .417 .427 .428 .429 .430 .431 .451 .452 .454 .455 .458 .459 .460

## SAECO Lead Hardness Tester

**A precision instrument to accurately determine the hardness of a bullet casting alloy.**

A SAECO Lead Hardness Tester will pay for itself many times over by allowing you to convert inexpensive scrap lead of unknown composition into casting alloy of known and reproduceable hardness. It provides a standard by which you can check the quality of purchased cast bullets. The SAECO Lead Hardness Tester measures alloy hardness by determining the depth of penetration of a hardened steel indenter into a bullet. Relative hardness of the bullet is read off a vernier scale.

The vernier scale is calibrated in arbitrary units from 0 for pure lead up to a SAECO hardness of 10. We have found that a SAECO hardness of at least 6 is required for medium velocities in handguns and a SAECO hardness of over 8 for Magnum handgun and gas check rifle bullets. As a point of reference, wheelweights vary in composition and hardness but usually test between 7 and 9, while linotype registers approx. 10.

Relative Hardness	SAECO	Brinell (Approx.)
Pure lead . . . . .	0-1	5
1:20 tin: lead . . . . .	6-7	10
5:5:90 tin: antimony: lead . . . . .	7-8	15
2:6:92 (taracorp) . . . . . (magnum alloy)	8-9	16-17
5:10:85 (linotype) . . . . .	9-10	22

**ITEM NO. 42000 . . . . . \$253.40**

# SAECO Precision Bullet Moulds

All SAECO moulds are machined from solid cast iron blocks one cavity at a time. Using the same cutting tool (cherrie) for each cavity on digital equipment guarantees that each cavity duplicates the previous one. You don't need to pay a premium for matched cavities. SAECO even developed its own blend of copper alloyed pearlitic cast iron for tight grain structure, dimensional stability and extended life. The steel sprue plates are held firm against the mould blocks by high-temperature spring washers to insure uniform bullets with square bases.

**1 Cavity "Magnum" . \$133.90    2 Cavity "Magnum" . \$179.80    SPECIAL ORDER 3 CAVITY MOULDS**  
**2 Cavity . . . . . 150.40    4 Cavity . . . . . 252.40    All 3 cavity moulds are made on a special**  
**order basis only. . . . \$ 202.90**

**WARNING:**  
 Melting lead and casting lead objects will expose you and others in the area to lead, which is known to cause birth defects, other reproductive harm and cancer. See instructions on Reducing Exposure supplied with product.

## "Magnum" Mould Blocks Available in Single and Double Cavity

"Magnum" mould blocks were created to insure more uniform temperature control and casting consistency when casting large diameter and/or heavy bullets. Single cavity "Magnum" moulds are made from our normal double cavity blocks. Double cavity "Magnum" moulds are made from our normal triple cavity blocks, with wider spacing.

"Magnum" moulds can be ordered for any caliber or weight bullet and are required for those moulds marked with asterisk\*.

**Mould Handles**  
 Castings are ductile iron with solid hardwood grips. They should be ordered separately and fit all SAECO mould blocks.  
**ITEM NO. 29000 . . . \$68.00**

## Traditional Bullet Moulds For Black Powder Cartridges & Cowboy Action Shooting

## Bullet Sizes & Weights – How to Vary Them

The bullet diameters and weights presented in this list are based on the use of Taracorp's Lawrence Magnum bullet alloy (2% tin, 6% antimony, 1/4% arsenic, 91.75% lead).

Bullet diameters and weights will vary considerably depending on the lead casting alloy used. This variation can be as much as 1/2% on the diameter, and 8% on the weight among the most commonly used casting alloys. For example, a .358-158 grain bullet might show a diameter variation of .002", and a 13 grain difference in weight.

Of the most commonly used alloys, wheel weights (.5% tin, 4% antimony, 95% lead) will produce bullets having the smallest diameter and heaviest weight, with such bullets running approximately 1/3% smaller in diameter and 3% heavier than bullets cast with Taracorp's metal. Linotype will produce bullets with the largest diameter and lightest weights. This alloy will

produce bullets approximately 1/10% larger and 3% lighter than Taracorp. Other alloys of tin and antimony, with antimony content above 5%, will produce bullets with diameters and weights falling between those cast from wheel weights and linotype.

Alloys containing little or no antimony will cast considerably smaller than wheel weights and in some cases will produce bullets too small for adequate sizing. Within the limitations given above, the weight and diameter of a cast bullet can be adjusted by varying the alloy's antimony content.

The size and weight of bullets of a given alloy will also vary according to casting temperature. Higher temperatures will result in greater shrinkage as the bullet cools, thereby producing a slightly smaller and lighter bullet than one cast of the same alloy at a lower temperature.

## Gas Checks

SAECO has adopted the tapered form of gas check heel to minimize problems encountered with the use of various alloys and gas checks. SAECO bullets are designed to properly maintain the gas checks when cast with Lawrence Magnum Bullet Metal or linotype. Alloys producing smaller diameters may result in gas checks not seating properly. Bullet weights listed for gas check designs include the gas check weight.

## Bevel Base Bullets

SAECO Bevel Base bullets have a slight bevel at the base of the bullet. This bevel helps guide the bullet into the cartridge case. A benefit of using bevel base bullets is that the case will require minimal bell-mouthing, and have a longer case life. Bevel base bullets are of course easier to seat.

**DEBURRING TOOL**

Removes burrs and bevels case mouths for easy bullet seating. Hardened precision ground flutes make clean, easy, chatterfree cuts. Accepts all cases from .17 to .45 caliber. NO. 09000 ..... **\$37.90**

**DIE SPACER KIT**

For use with combination die sets and all 7/8-14 reloading dies to quickly compensate for case length or make a no-crimp adjustment without the need to move the lock rings. Kit includes three spacers: No-crimp or partial resizing, 44 Spl/44 Mag spacer, 38 Spl/357 Mag spacer. NO. 80901 ..... **\$14.70**

**CASE PREPARATION KIT**

All the tools you need in one package for removing dirt and powder residue from the inside of case necks and primer pockets. Kit comes complete with accessory handle, large and small primer pocket cleaners and three (3) case neck brushes to handle all cartridges from .22 thru .45 caliber.

- NO. 18000 ..... **\$38.10**
- NO. 18005 Accessory Handle ..... **11.10**
- NO. 99139 Lg. Pocket Cleaner ..... **7.00**
- NO. 99138 Sm. Pocket Cleaner ..... **7.00**
- NO. 99137 Lg. Neck Brush ..... **5.20**
- NO. 99136 Med. Neck Brush ..... **5.20**
- NO. 99135 Sm. Neck Brush ..... **5.20**

**Shooting Caps**

**Style "A"**  
No. 99955

Low Profile, six panel heavy brushed twill cap. Fabric Strap Adjuster with Velcro®, front and rear embroidery. Color Tan /Dark Green **\$18.30** ea.

**Style "C"**  
No. 99960

Low Profile, six panel heavy brushed twill cap. Fabric Strap Adjuster with Velcro®, front and rear embroidery. Color: Dark Green **\$18.30** ea.

**Style "B"**  
No. 99965

Low Profile, six panel distressed twill unstructured cap. Fabric Strap Adjuster with brass buckle, front and rear embroidery. Color: Stone Washed Green **\$18.30** ea.

**Style "D"**  
No. 99950

Low Profile, six panel Advantage® Timber cap. Fabric Strap Adjuster with brass buckle, front and rear embroidery. Color: Advantage® Timber **\$19.40** ea.

**Style "P"**  
No. 99970

Low Profile, six panel chino twill unstructured cap. Fabric Strap Adjuster with brass buckle, front and rear embroidery. Color: Pink **\$18.30** ea.

*Proceeds from Pink Cap supports Camp Good Days and Special Times Women's Oncology Programs*

**Official Redding Apparel now available, visit our website: [www.redding-reloading.com](http://www.redding-reloading.com)**

**CASE LUBE KIT**

The most popular way to properly lubricate cases for resizing and case forming. The bottom side of the pad includes non-skid feet so it won't skate all over your bench when you are using it. Kit now includes a 2 oz. plastic bottle of Imperial Bio-Green.

- Redding Case Lube Kit NO. 12012 ... **\$28.10**
- Case Lube Pad only NO. 12010 ..... **\$19.80**
- Replacement Insert NO. 12007 ..... **\$ 4.80**

**ORIGINAL FORMULA CASE LUBE**

Packaged in 2 oz. plastic squeeze bottle. Formulated for tough resizing and forming operations. Prolongs the life of your dies and simplifies reforming. There is a difference in case lubes! NO. 21000.... **\$10.80**

**REDDING BRAND IMPERIAL SIZING DIE WAX**

The original Imperial non-liquid sizing die wax, reformulated and manufactured by Redding. True to the original LeClear product of the 70's, even the classic green color. Packaged in 1 oz. tins.

- ITEM NO. 21022 (1 oz. tin) ..... **\$9.60**

### STUCK CASE REMOVAL KIT

Sooner or later everyone does it. Too little case lubricant (or using ordinary oil) and the case seizes in the resizing die. Usually, the rim pulls off and it is almost impossible to remove the stuck case without damaging the die. This case removal kit provides an easy solution to your problems.

Instructions included.  
NO. 22000 ..... **\$33.75**

### EXTENDED SHELLHOLDERS

Extended shellholders are required when trimming short cases under 1 1/2" O.A.L.

They are machined to the same tolerances as our standard shellholders except they're longer.

See Reference Charts on pages 22 & 23 for proper shellholder number.

NO. 115XX (specify shellholder #) ... **\$22.30**

### POWDER FUNNEL

Nearly indestructible, super-tough Lexan™. Fits most cartridge cases from .22 to .45 caliber.

Anti-static prevents powder from sticking. Not to be used with black powder.

NO. 13000 ..... **\$9.90**

### POWDER MEASURE RESERVOIRS

Replacement powder reservoirs are available in three sizes with or without caps. The smallest shown is the same as originally supplied on your Redding powder measure. The intermediate is 7" overall length and the largest available is 10". These fit all models of Redding powder measures using a 2-1/8" O.D. reservoir.

- NO. 99130 Original Replacement Reservoir ..... **\$11.10**
- NO. 99333 Original Replacement Reservoir with cap ..... **\$15.20**
- NO. 99157 7" Reservoir ..... **\$15.20**
- NO. 99165 7" Reservoir w/ cap ..... **\$18.90**
- NO. 99162 Long 10" Reservoir ..... **\$18.90**
- NO. 99167 Long 10" Reservoir with cap... **\$22.30**
- NO. 99101 Reservoir cap ..... **\$ 5.10**

### BENCH STAND

For convenient bench-top mounting of Redding Powder Measures. Will also fit all other Powder Measures with 7/8-14 thread mounting. This bench stand is not threaded; it is secured with a lock ring which enables you to rotate the measure to any desired position and permits quick dump of the reservoir.

NO. 06000 ..... **\$55.30**

#### Interesting Note:

*Our tests have demonstrated that powder measures show slightly improved accuracy when mounted in a bench stand securely fastened to a solid bench.*

### DOUBLE "C" CLAMP

Now available in two sizes. The original SAECO Double "C" Clamp was designed as a convenient way to secure the SAECO lubrisizer to a bench top. The newest model is the ideal size for clamping the Redding powder measure stand and case trimmer to a bench top. Both units will accommodate a bench thickness of up to 2-1/4". May be used to mount any number of tools. Handy items for any reloading room.

NO. 30120 Lubrisizer Clamp (2-3/8" inside fingers) .... **\$38.10**

NO. 30520 Bench Stand/Trimmer Clamp (1-5/8" inside fingers) .... **\$38.10**

Note: NO. 30520 also fits Case Neck Gauge

### INGOT MOULDS

The SAECO cast iron ingot mould will produce four easy-to-handle ingots. A perfect way to store blended alloys.

NO. 23000...**\$34.30**

## Spare Parts

The spare parts listed represent only the most commonly requested service parts. For price and availability of items not listed, please consult factory.

### NO. RS-1 STANDARD POWDER SCALE

- Pan ..... **\$10.50**
- Pan Hook ..... **7.30**
- Main Bearing\*\* ..... **10.50**
- Clean & recalibration\*\* ..... **19.10**

### NO. 2 MASTER POWDER SCALE

- Pan ..... **10.50**
- Pan Hook Assembly ..... **12.10**
- Main Bearing\*\* ..... **10.50**
- Beam Assembly\*\* ..... **55.10**
- Clean & recalibration\*\* ..... **19.10**

\*\*Scale must be returned to factory for replacement, cleaning and recalibration.

### NO. 3 & 3BR POWDER MEASURES

- Drop Tube ..... **7.30**
- Lock Screw ..... **4.10**
- Cap only ..... **5.10**
- Reservoir Screws (2) ..... **1.00**
- 3BR & BR-30 Operating Handle ..... **18.60**
- Drop Tube Adapter .17 & .20 cal. .... **13.30**

### NO. 1400 CASE TRIMMER

- TiN Cutter (specify standard or .17 cal.) ... **34.60**
- Shaft Only ..... **14.70**
- Collet ..... **25.50**
- Collet, 470 Nitro ..... **25.50**
- Pilots (Solid Shank Style) ..... **7.20**
- Cutter Sharpening ..... **10.10**

### PARTS FOR OLD STYLE TRIMMERS

- (Models 13, 14, & 14K)
- Cutter Blade (Square or "V") specify ..... **8.30**
- Pilots (No. 15 Split Shank) ..... **8.30**

### ULTRAMAG & BOSS PRESS

- Primer Arm Assembly ..... **24.80**
- Primer Pin (Lg. or Sm.) specify ..... **2.90**
- Primer Pin Sleeve (Lg. or Sm.) specify .... **2.90**
- Primer Pin Spring ..... **1.00**
- Boss Primer Catcher ..... **10.20**

### T-7 TURRET PRESS & BIG BOSS

- Turret, seven station w/bushing ..... **114.90**
- Primer Arm Assembly ..... **24.80**
- Primer Pin (Lg. or Sm.) specify ..... **2.90**
- Primer Pin Sleeve (Lg. or Sm.) specify .... **2.90**
- Primer Pin Spring ..... **1.00**
- Big Boss Primer Catcher ..... **10.20**

### NO. 12 CASE LUBE PAD

- Foam Pad Insert ..... **4.80**
- Adhesive Non-skid Feet (4) ..... **1.60**

### NO. 10 MISCELLANEOUS DIE PARTS

- Die Spacer Rings- each ..... **5.80**
- Plastic Die Box ..... **9.30**
- Small Lock Rings ..... **3.20**
- Body Lock Ring 7/8"-14 ..... **5.40**
- Decap Pins (Pkg. of 10) lg. or sm. .... **7.30**

## Who we are . . .

**W**e are dozens of Americans finding success in a traditional manufacturing business in rural, Upstate New York. We are Mothers, Fathers, Grandparents, Great Grandparents, Brothers and Sisters. We are Veterans, First Responders, Firefighters, and Community Volunteers.

We are also hunters and target shooters, concealed carry permit holders, Hunter Safety Instructors and believers in the freedoms upon which this country was founded. Each one of us make the equipment contained in this catalog under one roof, in one plant, to one quality standard which is still the envy of the world.

We are proud to live in this great nation and each share a commitment to do our jobs by making the best reloading equipment to be had anywhere in the world. That is why we, with no hesitation, offer you a Lifetime Warranty.

## Lifetime Warranty

All Redding Reloading Equipment has been carefully inspected prior to shipment and is fully warranted to be free from defects in materials and workmanship for life. Imperial and SAECO products now manufactured by Redding carry the same warranty.

Any product or parts which prove to be defective will be replaced or repaired without charge if returned prepaid to the factory.

Note: We reserve the right to decline responsibility where misuse or careless handling is evident or where repairs or modifications have been made or attempted by others.
