Redding Reloading Expands National Match Product Line and Adds Carbide Expander Buttons

Cortland, NY.....New for 2015, Redding Reloading has added numerous chamberings to its popular National Match (NM) die sets. Very well respected and successful as competition dies for military match style events, the National Match Die Set concept has only been offered in sanctioned calibers. With the ever-increasing rise of the AR platform rifles in the hunting and general target shooting arenas, Redding has responded to market requests by adding the following new calibers to the product category:

• 204 Ruger • 243 Win • 6.5 Grendel • 6.5 Creedmoor • 260 Rem • 7mm/08

These are in addition to the original offerings in:

• 223 Rem • 6.8 SPC • 300 BLK • 308 Win • 30-06 Sprg

The National Match Set is comprised of a Full Length Sizing Die a Competition Seating Die and a Taper Crimp Die. Also new for 2015, all National Match Die Sets will be upgraded to (NM-C) sets with carbide expander buttons. Carbide buttons are a very popular accessory and the benefits are well known. These reduce brass stress and make opening necks far easier due to carbide's inherently lower coefficient of friction. The Carbide Expander Button is also free floating to follow the interior of the neck, which many believe benefits enhanced concentricity. Both of these benefits are especially beneficial to high volume reloaders and those who load on progressive presses.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946. To learn more about our ongoing commitment to the precision handloader and to request a copy of the new 2015 Redding catalog visit:
