## **Redding Reloading Equipment Adds New 6.5 mm GRENDEL™ Die Sets**

Cortland, NY..... Redding Reloading Equipment introduces new die sets in 6.5mm GRENDEL™ for 2017. They will be available in Type-S, Type-S Match and now Competition Die Sets for the avid long-range, shooting and hunting enthusiast.

Originally developed for use in the AR 15 type platform, it has evolved into a solid long range hunting and target shooting performer and has been applied to a variety of action types, always with an emphasis on low recoil and long rang accuracy. Factory loadings and brass are available from a number of sources. New bullets continue to expand the cartridge's potential in many areas where the GRENDEL has already become well respected. Redding has tracked the development and progress of the cartridge and has responded to market demands with higher level precision die sets to meet the needs of the current and future applications for this excellent cartridge.

Now serious accuracy enthusiasts have the opportunity to expand their handloading abilities through the use of Redding' Bushing style and Competition Dies, including the legendary Redding Competition Seating Die. These sets will assist any rifle and shooter combination to attain their full potential, both in the field and at the range.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946. To learn more about our ongoing commitment to the precision handloader and to request a copy of the new 2017 Redding catalog visit: [www.redding-reloading.com](http://www.redding-reloading.com)
