Redding Reloading Equipment Adds New 6 mm Creedmoor Die Sets

Cortland, NY..... Redding Reloading Equipment introduces new die sets in 6mm Creedmoor for 2017. They will be available in Type-S, Type-S Match and Competition series Die sets for the most demanding handloading enthusiasts. Redding is known for both its commitment to quality and the vast selection of dies it makes available, including many popular and not so popular wildcats.

Derived for the very popular 6.5 Creedmoor this new chambering has quickly gained industry acceptance. Factory brass is already being produced and we anticipate a number of new rifles to be available at the show. Redding will always respond to innovation in the firearms market and keep the serious handloader ready for the next new addition to the precision cartridge world. Customers should know that these dies will be available shortly after the SHOT Show in retail distribution and that Redding Reloading Equipment will continue to support popular, new calibers as they are introduced.

It is important to note that Redding continues to produce truly “Custom” die sets as well. The Engineering Group at Redding requires only a chamber reamer drawing or 5 fired cases from the firearm in question to quote the production of dies for virtually any caliber and firearm which can be made with a 7/8 x 14 TPI die body. Prices are quoted on an individual basis depending upon the complexity of the chambering and any need for tooling. Those seeking dies for a truly unique or obsolete cartridge should contact the Redding Custom Die Center in the company’s Engineering Department.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946.
