Redding Reloading Equipment Adds New Competition Seating Die for the 6 MM Dasher

Cortland, NY..... With the renewed interest in this great cartridge, Redding Reloading Equipment is offering their renowned Competition Seating Die for the 6mm Dasher in 2018.

The 6mm Dasher has been on a positive growth trajectory for some time now in Bench Rest Competition. Redding has fully supported it with dies from their custom series. With the cartridge setting so many records and new brass entering the market, for 2018 the 6mm Dasher joins other long-range precision cartridges as a regular catalog item in Type-S Bushing Die sets with a Competition Seating Die available as well.

The Type -S die sets use an interchangeable bushing for the neck sizing portion and are offered as a full length, 2-die set or a neck sizing 3-die set which also includes a body die. These may be paired with a standard seating die or now in a Type-S Match configuration with the new Competition Seating Die. All dies are available individually so a prior owner may upgrade to the Competition Seating Die without the need of purchasing and new die set.

Redding continues to add cartridges to its standard product lines as consumer demand and industry support grows. It is also important to note that Redding continues to produce truly "Custom" die sets as well. The Engineering Group at Redding requires only a chamber reamer drawing or 5 fired cases from the firearm in question to quote the production of dies for virtually any caliber and firearm which can be made with a 7/8 x 14 TPI die body. Prices are quoted on an individual basis depending upon the complexity of the chambering and any need for tooling. Those seeking dies for a truly unique or obsolete cartridge should contact the Redding Custom Die Center in the company's Engineering Department. E-Mail: engineering1@redding-reloading.com>

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946.
