Redding Introduces National Match Die Set in 6.8 SPC

Cortland , NY.....The SAAMI approved 6.8 SPC cartridge has seen its stature grow in Military Match and Service Rifle competitions this past year. It remains a favorite with the shooters of Modern Sporting Rifles due to its unique capabilities and its inherent accuracy. It bridges a gap for hunting and target sports, which allows for the creation of match rifles with great hunting capability.

The Redding national Match Die sets were introduced three years ago in 223 Rem 308 Win and 30-06 Springfield and quickly became a "must have" for competitors and accuracy enthusiasts alike. The 300 Blackout was added last year and now the continued progression of the 6.8 SPC cartridge in the market has dictated that we provide it with the same level of performance and accuracy which the National Match Sets have in other calibers.

Like all National Match Die Sets the 6.8 SPC features a full length sizing die, a Redding Competition Seating Die and a taper crimp die for use in military match style semi auto rifles as well as Modern Sporting Rifles where accuracy is a primary concern. This series of die sets has been established as the direct result of requests from military match shooters who formerly bought the dies individually. Customers should know that these new 6.8 SPC die sets will be available shortly after the 2013 SHOT Show in retail distribution and that Redding Reloading Equipment will continue to support popular, shooting sports activities with innovative and appropriate reloading solutions.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946. To find more information and to request a copy of the new 2013 Redding catalog visit:
