## **Redding Offers Precision Powder Measuring for The Extreme Long Range MSR Shooter**

Cortland , NY.....Redding originally designed the Competition Model BR-30 to meet the demands of the Bench Rest shooting community. This measure was built with the goal of producing incredibly precise charges of powder in a range from 10 and 50 grains with an emphasis on the critical BR charges of around 30 grains. Today's AR Platform rifles (MSR's) have been continually accessorized and upgraded to provide amazing accuracy never previously considered possible from a 'gas gun'. Their users have begun to exploit this potential with long range varmint hunts as well as traditional steel and paper accuracy competitions. The most popular cartridges for these rifles are loaded with powder charges which are in the "sweet spot" of this measure, around the 30 grain mark, making it an ideal enhancement to the serious MSR shooter's loading bench. Additionally, Redding now offers a 17 and 20 caliber drop tube adapter making direct charging of cases like the 204 Ruger or 20 Vartarg simple, fast and very precise. Now the AR shooter intent on challenging him or herself with the longest and most precise shots, can do so more quickly and accurately, without the need for trickling every load. Bench Rest quality meets the black gun with the Redding BR-30. *In retrospect maybe Redding should have named this measure the "MSR-30".*

**The Redding Competition Model BR –30's** included features are:

- Micrometer adjusting metering chamber with hemispherical cup
- Cast iron and hard chrome construction
- Special backlash eliminating micrometer for repeatability
- Adjustable powder baffle
- Positive metering chamber lock

The 17 and 20 caliber drop tube adapter is available from most major resellers and carries a part number of, 03817.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946. To find more information and to request a copy of the new 2012 Redding catalog visit:
